Documentation for developers

- Working With Fedora Objects Programmatically Via Tuque
- Working Programmatically With XML Forms
- Programming Solution Packs
- Coding Standards
- Git guidelines and best practices
- How Islandora Code Gets Made
- Installing and configuring codesniffer
- Windows support
- Committers call agendas & notes

Roadmap Meetings

- 2012 Meetings
- 2013 Meetings
- 2014 Meetings

Release Team Meetings

- 7.x-1.4 Meetings

To see all of the current pages on this wiki its best to click the pages link above, a may not be current.

7 x 1.4 Release Meeting

Chair: Nick Ruest
Notes: Sam Fritz

Attending: Nick Ruest, Donald Moses, Sara Allain, Kim Pham, Jordan Dukart, Melissa Anez, Nigel Banks, Paul Pound, Kirista Stapelfeldt, Alan Stanley, Will Panting, Adam Kenny

Agenda & Notes

1. Timeline updates
   - Code freeze: Monday, branches have been created
   - Release candidate- candidate out approx. month before full release. This will help with documentation.

2. Feature for release or feature for next release? See this discussion- saved for committers call

3. Documentation

4. doc-a-thon Sept 19th before Roadmap.

5. Open Pull requests
   - Nigel and Alan to take components they are managing
   - ISLANDORA-1042
     - [https://github.com/islandora/islandora/pull/545](https://github.com/islandora/islandora/pull/545) (7.x)
     - [https://github.com/islandora/islandora/pull/548](https://github.com/islandora/islandora/pull/548) (7.x-1.4)
     - [https://github.com/islandora/islandora_bookmark/pull/569](https://github.com/islandora/islandora_bookmark/pull/569) (7.x)
     - [https://github.com/islandora/islandora_bookmark/pull/61](https://github.com/islandora/islandora_bookmark/pull/61) (7.x-1.4)
     - [https://github.com/islandora/islandora_solr_search/pull/188](https://github.com/islandora/islandora_solr_search/pull/188) (7.x)
     - [https://github.com/islandora/islandora_solr_search/pull/190](https://github.com/islandora/islandora_solr_search/pull/190) (7.x-1.4)
Virtual machine users and groups

Create a group for the virtual machine, and add vagrant user and apache user to that group so that the vagrant user can make changes to Drupal root without sudo/su.

Activity

Nick Ruest added a comment: 20/Aug/14 12:29 PM
- Created group 'web'
  - Added users 'vagrant' 'drupal' and 'www-data' to 'web'
  - chown'd drupal root to 'vagrant:web'

Nick Ruest added a comment: 20/Aug/14 1:17 PM
