Robin Dean, Digital Repository Director
Colorado Alliance of Research Libraries
robin@coalliance.org
One Fedora

One Drupal

Many Sites
**SHARED**

- Drupal core installation
- Islandora release modules
- Fedora repository

**UNIQUE**

- URL
- Theme
- Modules
- Files
- Users, roles, permissions
- Fedora PID namespace
- Fedora user
- Solr search
Cautions…

• Performance issues with many users doing content loading/repository management at the same time

• User access (freedom vs safety)

• Local customizations when troubleshooting

• Knowing where to add modules/themes
Example multisites

http://uwyo.coalliance.org
